

NATIONAL & SYSTEM AGREEMENTS

Included in this Section is a Compact Disc (CD) containing many of this property's system agreements and understandings, along with a few of our national agreements. You will also find a printed index of its contents that has been arranged alphabetically by subject matter and identifies the path/folder of all documents on the CD relevant to that subject.

Note: As with all contractual matters, the content of these documents is sometimes subject to dispute. It is therefore recommended that questions regarding the intent or application of these documents should be directed to your Local Chairman for interpretation.

As updates or additional documents become available, they will be made available on our website at www.utugca.org. Once on the site, click on "New Hire Packet" to determine if a newer document exists.

A complete electronic library of our national agreements can be found on the UTU International's website at www.utu.org. The site also provides access to an extensive library of arbitration that may be *searched* by text. Included later in this section is a navigation guide to assist you with finding this material on that site.

The CD does not contain any local agreements that are unique to your location. If you would like an electronic copy of those, it is suggested that you attend a local meeting and inquire as to whether such is available. This office will assist any of the Locals under its jurisdiction with electronically formatting their local agreements but the request and document(s) must be furnished through the Local.

Also included on the CD are scanned files providing directory assistance within the UTU. While your first contact for most matters should be on the 'local' level, there may be instances that require communication with other offices. Please use this information accordingly.
